DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 8-12, drawn to a process of preparing a dry extract from a liquid extract, classified in class 424, subclass 725, for example.
- II. Claims 13-15, drawn to a dry extract including a dry extract incorporated into a medicament such as a tablet, classified in class 424, subclass 464, for example.

The inventions are distinct, each from the other because of the following reasons:

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product of Group II can be made using numerous conventional drying steps (that also includes incorporation of at least one additional substance during such processes) which do not include any or all of the steps of the Group I process (e.g., drying by evaporation, by lyophilization, by fluid-bed drying, etc.).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1654

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
